

ALIYYUL MUNIF

0823-2947-5745 | aliyyulmunif780@gmail.com | alymnf.vercel.app

PROFILE SUMMARY

A creative Frontend & Full-Stack Developer with a strong foundation in visual design. Specializes in building interactive user interfaces using React, GSAP, and Tailwind CSS, supported by a robust backend architecture. Has proven expertise in end-to-end application development, from designing relational databases to implementing real-time features and performing unit testing.

PROFESSIONAL EXPERIENCE

Freelance Graphic Designer

Self-Employed | 2025 – Present

Provide digital design assets and visual materials as a subcontractor, while adhering to project requirements and strict deadlines.

Apply a deep understanding of visual hierarchy, typography, and layout composition, and apply these principles to ensure flawless front-end implementation in development projects.

UI/UX Design Intern

metavisinusantara | Jul 2024 – Sep 2024

Designing wireframes and interactive prototypes for application interfaces using Figma.

Mapping out user flows to ensure intuitive navigation and a seamless user experience before moving into the development phase.

EDUCATION

SMK Ma'arif Walisongo Kajoran

Software Development – Graduate in 2025

- [React.js](#)
- [GSAP](#)
- [React Query](#)
- [Node.js](#)
- [Supabase](#)
- Tailwind CSS
- Vite
- Axios
- [Express.js](#)
- [Prisma ORM](#)
- Vitest
- Joi
- Git/GitHub
- [Figma](#)
- [Inertia JS](#)

TECHNICAL PROJECTS

Web-Based POS

Fullstack Developer

repository link: github.com/AlIyyulMunifrpX/maxsten

website link: maxsten.vercel.app

Designed and developed a comprehensive Point of Sale (POS) system to manage queues in real time. Designed a secure relational database schema and authentication workflow using Supabase and Prisma ORM. Implemented Socket.io for real-time data synchronization.
